Takamul AlMiemar For Contracting

About Us

Takamul AlMiemar Contracting is a leading firm in contracting industry, established in 2010. Since its inception, the company has built a strong reputation for delivering top-notch technology and quality in its projects. Takamul AlMiemar is dedicated to excellence by adopting the latest technologies and adhering to the highest standards of quality, making it a preferred choice for clients in the sector.

The company handles a diverse range of projects, including construction, fit-outs, and maintenance, with a focus on meeting and exceeding client expectations. With its specialized and experienced team, Takamul AlMiemar continues to strengthen its position as a reliable partner in infrastructure development and successful project execution.

The Message :

Providing high-quality projects by a professional team who put before their eyes one goal, which is to reach the best results at all levels, starting with project design and planning, and ending with implementation and final delivery.

Our Mission

To be construction partner for life, we aim to provide not only the best prices but also the best materials and customer service.

We believe in establishing a good relationship with our customers, but also, to provide ongoing training in new techniques and construction materials to our staff.

Our Vision:

To apply our expertise and growth oriented values across all domains to establish ourselves as the experts in our field, deliver superior engineering to clients, and obtain the maximum value by staying true.

to the best Being among the top businesses mean offering professional, high-quality integrated construction services, along with a complete dedication to innovation and the creation of the best urban products in compliance with most recent international standards.

OUR VALUES

Our top priority and first concern is client satisfaction.

The company is accountable for its actions and achieving client objectives as a result of its high professional quality, credibility and honesty, transparency and clarity. innovation and creativity, quick performance and execution, and skill development for its engineering, technical, and administrative staff.

Works safely and is dedicated to ensuring the health and safety of our employees.

Transparency, credibility, and trust with clients, subcontractors, and partners in regional engineering projects.

**OUR
CAPABILITIES:**

OUR CAPABILITIES:

General Contracting, EPC projects

Takamul AlMiemar Whenever the client seeks a specialized contractor to carry out a project, The EPC projects handles the engineering design, the procurement of the resources that the project needs, and its construction.

After a fixed duration the finished project been delivered to the client.

Steel structure & Metal works

Our team can deliver the necessary technical expertise and professional management with outstanding workmanship in teaming up with our success partners to complete the assignment on schedule.

Electrical Systems Medium & Low Voltage Electrical Systems

Medium & low voltage construction Distribution Substations, Switchgear, Distribution Transformers, Unit Substation, Transformers, smart RMU'S & Grounding Systems In compliance with the project design and the client's requirements our team and success partners are able to finish the project on time and with outstanding workmanship.

MEP Infrastructure Development

With respect to Mechanical, Chilled water pipe lines, Storm , Drainage system , Water supply , Medium and low voltage networks in compliance with the project design & the client's requirements, Our team in collaboration with our success partners are able to finish the project on time and with outstanding workmanship.

Integrated MEP Solutions

Mechanical, Chilled water pipe lines, Storm, Drainage system, Water supply, Medium and low voltage networks, power generation plants, Electrical power substations, in compliance with the project design and the client's requirements, Our team in collaboration with our success partners are able to finish the project on time and with outstanding workmanship.

HVAC Systems (Heating, Ventilation, and Air Conditioning)

Central chiller plants, VRV, DX HVAC SYSTEMS, In compliance with the project design and the client's requirements, our team and success partners are able to finish the project on time and with outstanding workmanship.

Power Generation Plants Ventilation, Noise Control and Fuel

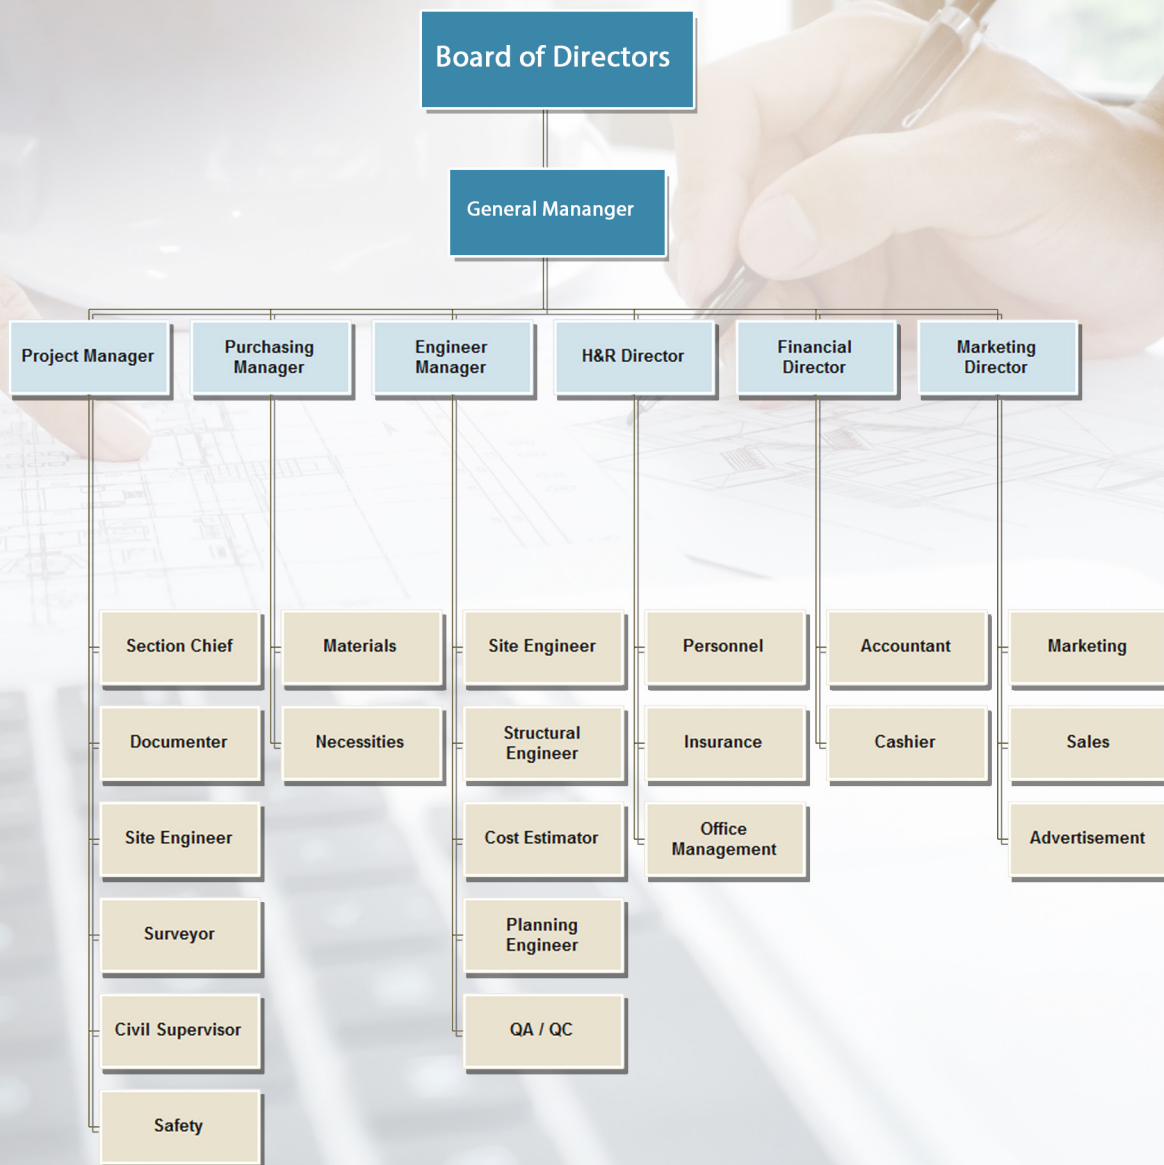

System Solutions In compliance with the project design and the client's requirements, our team and success partners are able to deliver Power Generation Plants, Ventilation system, Noise Control and Fuel System Solutions on time and with outstanding workmanship.

Fire Protection Systems

Smoke control system, Fire alarm , sprinkler firefighting and clean agents fire suppression systems in compliance with the project design and the client's requirements our team and success partners are able to finish the project on time and with outstanding workmanship.,

Industrial Projects

ALRASHED WOODEN FACTORY – RABIGH

Client:

ALRASHED GROUP

LOCATION:

RABIGH CITY

The project is a turnkey, -10month project requiring renovating and building two wooden factories, an admin area, water and septic tanks, guard rooms, fences, and landscaping, includes HVAC, MEP system , infra structure drainage, water supply, and storm networks. The total land area is 95,000 M2.

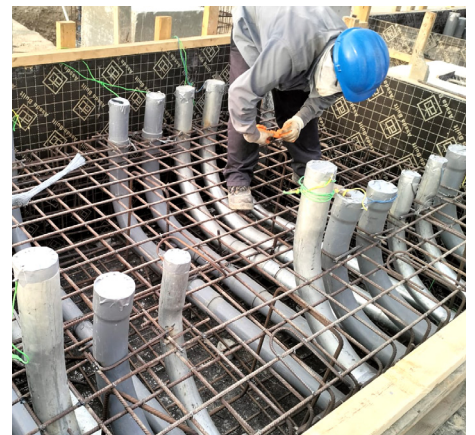

Rabigh 1200 MW CCPP – KSA

Client : SCECO

LOCATION : RABIGH CITY

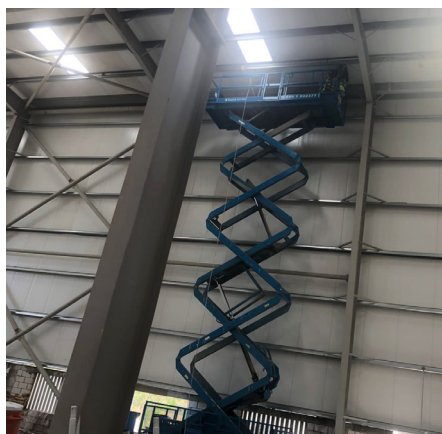

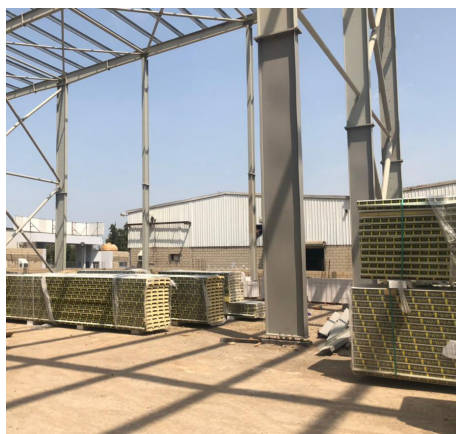

COMBINED CYCLE , 1200 MW power generation PLANT , under THE CONSORTIUM OF SIEMENS ENERGY GLOBAL GMBH & CO. KG. & ELSEWEDY ELECTRIC PSP MEP scope of work in including earthing net work , STORM , WATER SUPPLY , DRAINAGE , CABLES NET WORKS and inside building MEP systems .

MAHMOUD SAED CANS FACTORY – JEDDAH

The project is a turnkey, -6month project requiring renovating and building cans factory warehouse , fences, and landscaping, includes HVAC, MEP system , infra structure drainage, water supply, and storm networks. The total land area is 10,000 M2.

Projects Gallery

**ELECTROMECHANICAL
SERVICES**

MEP Services:

Supplying and installing of all low voltage systems

- Low voltage cables pulling, installation and fixation.
- Low voltage Panels installation.
- Cable trays and cable ladders fixation.
- Lighting Systems (indoor – outdoor)
- Power Systems (Sockets - HVAC switches – pump feedings-etc.)
- Electrical landscapes work.

Supplying and installing of all light current systems.

- Data and telephone systems
- Fire alarm system
- CCTV systems
- Nurse call systems
- Intrusion systems
- Public address systems
- TV System
- Queuing Systems
- KNX systems

Supplying and installing of all mechanical systems.

- HVAC Systems
- Plumbing systems.
- BMS systems.
- Firefighting systems
- Drainage systems.

Supplying, installation of electrical MV equipment's transformers,

- MV switchgear, control panels, relay panels,
- RMUs, package substations ... etc.
- Maintenance for medium voltage equipment.
- MV Cable Laying, Splicing and Termination up to 33 KV.
- MV and LV switchgears
- upgrade and extension.
- Testing and Commissioning

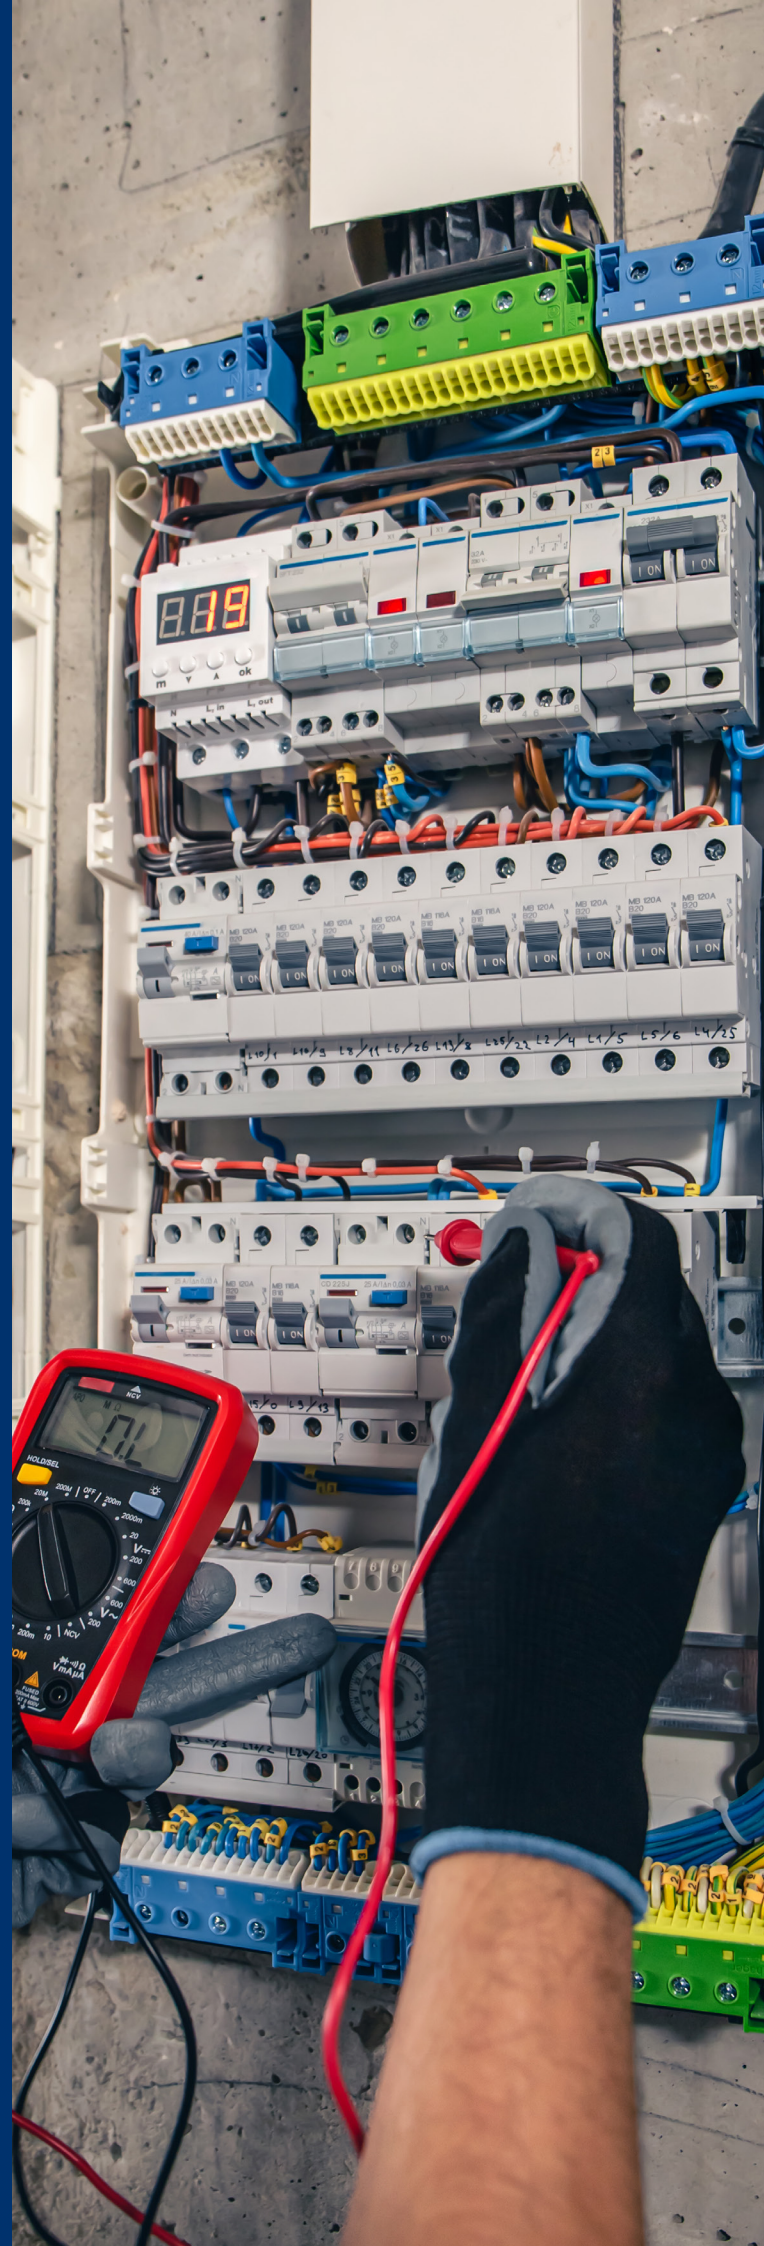

Our technical field services range from performing site acceptance testing of HV, MV and LV distribution equipment and protection panels to performing on-site trouble shooting, operation / maintenance testing and equipment upgrade services. More specifically, these services include:

- Testing and Commissioning of HV, MV and LV distribution equipment.
- Testing and Commissioning of Protective Relays and Systems.
- Testing and Commissioning of DCS / SCADA Control Systems.
- Testing and Commissioning of UPS / Battery Charger Systems.
- Protection System and Distribution Equipment Upgrades.
- Engineering Design and Consulting

Services Our engineering design and consulting services range from providing detailed engineering support to electrical equipment manufacturers to conduct power system studies for customers in the oil and gas, industrial and utility markets. More specifically, these services include:

- Base and Detailed design service for LV and MV distribution equipments.
- Base and Detailed design services for power Generation equipment.
- Control Systems Engineering for MV and LV Generation and Distribution Networks.
- Scheme design.
- ETAP Studies.
- Load Flow Analysis.
- Cable sizing/ampacity.
- Ground Grid System.
- Transformer sizing.
- Short Circuit Analysis with Device Duty.
- Protective Devices Coordination study.
- Arc Flash Analysis and Arc Flash Mitigation.
- Motor Acceleration (Static/Dynamic).
- Harmonic analysis.
- Transmission lines Sag and Tension.
- AC & DC PV Array.
- Battery sizing calculations.
